

Security BSides Delaware 2020, was a 2-day virtual information security conference held in Wilmington, DE on November 13-14, 2020. The conference provided various talks, training classes and hands-on workshops covering a wide range of cyber security topics.

I, \_\_\_\_\_, attended the Security BSides Delaware 2020 conference on November \_\_\_\_\_, 2020.

I attended this conference for a total of \_\_\_\_\_ hours, for which I would like to receive \_\_\_\_ CPE credits in support of \_\_\_\_\_

The list of talk(s), class(es), and other event(s) I learned from and/or participated in are detailed on the following page(s) to support my request for Continuing Professional Education credits. Attached is a copy of my registration confirmation from Eventbrite, my ticket ID \_\_\_\_\_ can be verified if needed. Official attendance requires participation within Discord where all facilitated and informal discussions took place, this was akin to the informal conversations that happen at an in-person conference and often have significant value. The conference can verify attendance for all participants who completed the Registration Self Check-In form during the conference. The form was posted in the announcements channel within Discord.

Signed,
